SOLUTION OVERVIEW

Tenable for Chronicle
Enhance Security Insights with Vulnerability Context

Business Challenge

Organizations depend on the joint integration of Tenable and Chronicle to harness security data to detect and respond quickly to threats. It is essential for security leaders to have full security context when making decisions by integrating critical vulnerability intelligence into their security telemetry platform. Security leaders are at risk of weak incident investigations and incomplete security context when they take the right remediation actions to protect their organization.

Solution

The integration combines Tenable's Cyber Exposure insights with Chronicle's security telemetry platform to have visibility into all assets across the modern attack surface, operationalize vulnerability data and enhance SOC processes with new context information in a single analytics platform. Together, the combined solution enables joint customers to sync vulnerability information, prioritize vulnerability remediation based on actual risk and have confidence to take action and respond quickly with proper context.

Value

The Chronicle integration for Tenable provides the ability to:

- Discover additional hosts that were previously unknown to Chronicle
- Gather up to date vulnerability data during investigations
- Enrich existing events with vulnerability context information
- Automate a closed-loop remediation process with vulnerability assessment and prioritization
- Improve remediation decision making with a comprehensive dashboard

Technology Components

- Tenable.io
- Chronicle

Key Benefits

- **Automatically sync** Tenable data into Chronicle Backstory
- **Ensure all systems are known**
- **Enhance SOC processes** with new context information
- **Automate** Closed-loop remediation
- **Improve remediation** decision making with vulnerability insights

ABOUT TENABLE

Tenable®, Inc. is the Cyber Exposure company. Over 30,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world's first platform to see and secure any digital asset on any computing platform. Tenable customers include more than 50 percent of the Fortune 500, more than 30 percent of the Global 2000 and large government agencies. Learn more at **www.tenable.com**.

ABOUT CHRONILE

Chronicle is a global security telemetry platform for investigation and threat hunting within your enterprise network. Chronicle makes security analytics instant, easy, and cost-effective. Chronicle is a specialized, cloud-native security analytics system, built on the core infrastructure that powers Google itself.

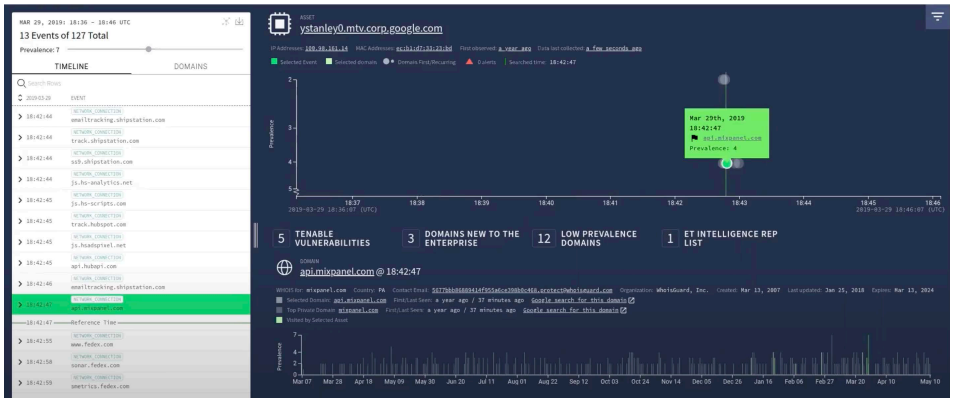
Features

With this integration you can:

- Sync vulnerability information from Tenable.io
- Prioritize remediation based on the likelihood of a vulnerability being exploited
- Scan a host during an investigation
- Request a remediation scan during an investigation
- Get the latest vulnerability summary for a host during an investigation
- View a single dashboard with configured vulnerability feeds



The Diagram shows Tenable's vulnerability insights featured in Chronicles dashboard to give security teams the full picture to help make remediation decisions
